COVID-19

COVID-19 TESTING PROTOCOL FOR GITAM VISAKHAPATNAM CAMPUS

From January 2021 onwards, we will be having an increased inflow of students where our students need to be tested upon entry into GITAM Campuses during this period.

With the increase in the frequency of testing, we hope to allow our students to safely return from January 2021 onwards and safeguard every single individual in the GITAM Campuses.

To make sure that we are COVID safe, every student will be tested during this period before accessing any of our campuses. GITAM Visakhapatnam Campus has tied up with GITAM Institute of Medical Sciences and Research to test the students as required.

Students will be sent to the GIMSR Swab Collection Center as a walkin if we have less than 10 students. If we have more 10 students, a Swab Collection Camp will be organized in the Campus and the students will be tested accordingly based on the inflow of students on a particular day.

All COVID Test results will be shared in 48 hours by the GIMSR Lab.

Please contact covid19help@gitam.edu for more details and support.
